

Backup battery for Canberra network room

Overview

Batteries are the key energy storage component within a UPS system and require regular inspection and inspection. We provide VRLA (valve regulated lead acid) battery testing using hand-held terminals with Cloud accessed data analysis. Our battery inspection reports can help to build-up the performance profile. As part of our power generation package the Synchronised Power team can advise on and supply local standby generators and their integration with. Energy storage is one of the fastest growing sectors within the power protection and electricity distribution sectors. Grid scale energy storage systems can be used as.
