

China Solar Phnom Penh Energy Storage Advantages

Overview

Cambodia's current domestic electricity supply is dominated by coal power plants and hydropower, at 41% and 44%, respectively, while solar is at 6% and growing. According to the Ministry of Mines and Energy. Despite Cambodia's recent growth and development, 1 out of 5 households in rural areas remains off-grid, meaning they don't have access to power provided by utilities, and are unable to access reliable and affordable electricity. Residents of Cambodia's populated cities and urban areas are frustrated by power shortages and power cuts during the dry season. But even that is a.
