

## Compared with solar photovoltaic power generation

### Overview

With all these comparisons between Concentrated Solar Power and Photovoltaic, one would get the idea that these two are competing against each other. At first glance, it actually makes a lot of sense to make this. So, now that we already know that CSP and PV have their own advantages and disadvantages, it shouldn't surprise us anymore that there are many projects for these two. Nowadays, there are two technologies that dominate the solar power industry: the Concentrated Solar Power (CSP) and Photovoltaic (PV). These two may be similar in that they both use the sun in order to generate power.
