

# Does the battery need to be changed

## Overview

Here are the things that could have caused the battery issue. Here's the difficulty with battery difficulties – the problems that show up when a battery is simply lacking charge are the same as those that show up when the battery is dying, and will completely fail soon. We'll show you exactly how to identify which one. And it is. \*drumroll, please\* Use a car battery tester. Why is it such an effective solution?

Because a quality 12V battery tester will tell you both the charge level (State of Charge, or SoC), and the health of the battery (State of Health, or SoH). Here's how to use a car battery tester to easily identify if your car battery needs to be replaced. – Step 1: Attach the clips to the battery terminals (positive clamp connected to the positive). If your car battery does need replaced, how do you know which one to get?

Well, this car battery buying guide shows you exactly how to find which battery you need. Yes, many batteries can be reconditioned. In fact, a high percentage of them can be recovered to quite a good level of health. Not all batteries can be reconditioned, but many can. The reason is.
