

Is the battery afraid of falling

Overview

A dying battery is not a pretty sight for many. Not everyone cares about their batteries dying, some may find it peaceful. For others, a low battery percentage stirs up feelings of unrest, stress, panic, or anxiety, and can elicit. In full: 'no-mobile-phone-phobia'. Defined as the fear of losing access to a smartphone, by leaving it at home, out of range, or battery running. Listen, we're not shaming anyone. Most of us are dependent on our phones for information and connection, so it makes sense to worry about losing access. In case you're not carrying a. It's clear that smartphones have grown into an ever-present part of life. According to Statista (2023), the world currently has 6.37 billion smartphone.
