## Overview

The lithium iron phosphate battery is a huge improvement over conventional lithium-ion batteries. These batteries have Lithium Iron Phosphate (LiFePO<sub>4</sub>) as the cathode material and a graphite anode. The choice. LiFePO<sub>4</sub> batteries do not harm the environment in any way. These batteries are more favourable towards the environment than other types of batteries. This is because. Yes, LiFePO<sub>4</sub> batteries are environmentally friendly. In fact, these batteries are considered. Yes, LiFePO<sub>4</sub> batteries are completely recyclable. It is now possible to even recover Lithium from spent LFP electrodes. This degree of recycling is not possible in other types of bat. Yes, LiFePO<sub>4</sub> batteries are considerably safer than conventional lithium-ion batteries. Lithium-ion batteries use materials like cobalt which are highly toxic in nature. This m.
