

# Should Solar Panel Installation Company

## Overview

At Solar Guide all of our registered solar installers are accredited with MCS or an equivalent scheme. If the company installing the renewable energy technology isn't certified then you can't be sure that they are properly qualified to carry out the installation and you won't be protected under the MCS (or equivalent). A structural report from a qualified ISE structural engineer is extremely important. You should never have solar panels fitted to your property without one. Your potential solar installer needs to determine how strong your roof is. Once a structural report has been carried out the solar installer will be equipped with the information needed to determine: 1. Whether your roof is. Shading should ideally be avoided. However there are ways to minimise the impact and it is important to analyse shading caused by. Whether you've got a tiled roof, a slate roof or even a flat roof, it's important to know how the installer intends to fix your lovely new solar panels to your roof. A solar PV system can be.
