

Solar Panel Cluster

Overview

The arid region north of Phalodi in India's Jodhpur district hosted some of India's earliest utility-scale solar power projects, dating back to 2011. Today it accommodates two solar parks and a growing number of smaller individual solar plants. The Godawari CSP plant at Nokh is also included in this cluster (see the red dot on the map). Gonghe County in Qinghai's Hainan Prefecture, China, looks like the world's 'giga-solar capital'. Readers of the previous articles in this series will know that Imperial County borders Mexico at Mexicali and has become home to many solar projects, including the multi-phase Mount Signal, Centinela and Imperial Valley projects. Recent. A second California valley is heading towards 5 GW – this one to the west of the Mojave Desert and north of Los Angeles, its sunny location is boosted by good connectivity to the electricity markets of south and central. It is a sign of how fast Vietnam's renewables market has progressed that it has now broken into this list. When it was last published in 2019, the whole of Vietnam had less than 1 GW of utility-scale solar. The southern.
