

Solar power supply belt manufacturer direct sales home hanging

Overview

Solar panels are produced by welding individual cells together using blasts of hot air. The welding process exposes the solar cells and the conveyor belts to temperatures of 390°C. A key feature of an automated solar panel manufacturing system is a specially designed vacuum conveyor that smoothly releases the solar panels to minimize handling at high. Metal belts retain their shape and last longer than plastic or fabric belts, enabling them to maintain maximum accuracy and product quality. Stainless steel conveyor belts offer cost savings to manufacturers by reducing the number of.
