

Summary of work related to solar energy

Overview

With reference to the recommendations of the UN, the Climate Change Conference, COP26, was held in Glasgow, UK, in 2021. They reached an agreement through the representatives of the 197 countries, where they concurred to move towards reducing dependency on coal and fossil-fuel sources. Furthermore, the. This paper highlights the significance of sustainable energy development. Solar energy would help steady energy prices and give numerous social, environmental and economic benefits. This has been indicated by solar energy's. Sustainable energy development is defined as the development of the energy sector in terms of energy generating, distributing and utilizing. Solar energy investments can meet energy targets and environmental protection by reducing carbon emissions while having no.
