

What does clean energy battery mean

Overview

So what is Clean Energy Charging?

This New iPhone feature works by selectively charging your iPhone when lower carbon emission electricity is available. This helps decrease your iPhones carbon footprint and reduce the environmental impact. Does this mean your iPhone will charge slower now?

Yes and no. To learn. If lower carbon emission electricity is not available, your iPhone will wait to start charging until it is. However, your iPhone will send you a notification. If your iPhone is charging slowly or you just don't want to use Clean Energy Charging, here's how to turn it off: 1. Open the Settings app and tap Battery. 2. Tap Battery Health & Charging. 3. Tap the toggle next to Clean.
